On November 10, 2014, ROBLOX launched an invite-only beta for the virtual currency Robux. It was released to a small fraction of its user base whose accounts had been verified by Robotcrab, Inc. The currency was named after ROBLOX's mascot. All games and item purchases could only be made with Robux. The overall value of Robux is dependent on ROBUX exchange rates in the game itself; however, all players are guaranteed to receive the same amount of Robux (at the same time) regardless of their financial situation or how they choose to use them.

If you have decided to use one of the Free Robux promo codes for ROBLOX, then you should always remember that you will only be able to use them once. You should also not come off of the website and think that there is nothing else to do or check out since there are lots of different things available on this site. There are also very limited resources which can be used for other people after using them inside your game account in ROBLOX. You should always remember to be very careful with your account information and never share it with anyone else. This is also the best way to protect yourself from those people who might want to hack or delete your account. If you use this method, then you can easily stay safe and continue enjoying all of the fun games that are available inside Roblox.

On November 24th 2018, the game was reuploaded on ROBLOX and was named simply "Anthem". It is the exact same game as before with no changes or improvements.[90] ROBLOX 3D: On December 23rd 2018, ROBLOX released a new version of their website called "Roblox 3D". The company claimed that it was meant to be an improved version of their 2014 release. The 3D design features many new animations and tools for users to create models. They also put a lot of time into making it look more modern.

The Roblox UI has a webcam in the bottom right corner, and many players have found that other players have used this to take pictures of them or record them without permission. This was also reported on an academic blog site.

One example of a troll game, created in 2005, was "Uppercut". This involved players being knocked into the air when they attempted to create their character. However, when the player hits the ground, they were shown a message saying that the creator of this game had disabled their inventory and that they had been defeated.
